Art

Abstract Nature

Directions: In each box, sketch an example of a natural object found in your region (such as a leaf, rock, stick, flower, etc.). Make sure to include color and details in your sketches. Answer the following questions to help you brainstorm for your unique house or building design.

1. Describe the shapes you just sketched. Are they tall? Do they look like a circle? Are they flat? Do they look like a triangle? Do they look like a rectangle? Do they display a combination of different shapes? Include details in your description.

If you were to turn one or both of the objects you just sketched into a house or building:

2. What shape would it be?
3. What kind of windows would it have?
4. What colors would it be?
5. What materials would it be made from?
6. Would it have more than one floor?
7. In what ways would your house or building be inspired by the nature objects that you sketched?
